

PY4 Residential Programs

Heating + Cooling Incentives (continued)

Then

Manual J Incentive:

Incentive for performing Manual J Right Sizing

Now

Manual J Incentive Discontinued:

No Incentive for Manual J Right-Sizing – Incentive discontinued.

PY4 Residential Programs

Cooling Incentives

Then

Customers can get incentives to help pay for the cost of installing new cooling equipment, e.g., central air conditioners, air source heat pumps and ground source heat pumps (geothermal).

Incentives are either Early Retirement (ER) or are replacing a failed unit or new construction.

Now

Cooling Incentives are now “tiered” according to efficiency rating of the unit being installed and the unit being replaced:

ActOnEnergy.com

PY4 Residential Programs

Cooling Incentives (continued)

Central Air Conditioners -- (Only new cooling units rated 14.5 SEER or greater are eligible.)	Amount
New construction; no pre-existing unit; replace on failure; or replacement of an existing central air conditioning or heat pump unit (with a nameplate SEER rating of 10.1 or greater) with a central air conditioner (SEER 14.5 - 15.9)	\$100
New construction; no pre-existing unit; replace on failure; or replacement of an existing central air conditioning or heat pump unit (with a nameplate SEER rating of 10.1 or greater) with a central air conditioner (SEER 16 or greater)	\$125
EARLY RETIREMENT - Replacement of an operational (cooling), existing central air conditioning or heat pump unit (with a nameplate SEER rating of 10.0 or less) with a central air conditioner (SEER 14.5 - 15.9)	\$250
EARLY RETIREMENT - Replacement of an operational (cooling) existing central air conditioning or heat pump unit (with a nameplate SEER rating of 10.0 or less) with a central air conditioner (SEER 16 or greater)	\$350
Geothermal (Ground Source Heat Pump)	
Installation of a geothermal unit (ground source heat pump). ONLY qualifies when replacing an electric heat source.	\$600

Cooling Incentives (continued)

Air Source Heat Pumps -- (Only new units rated 14.5 SEER or greater are eligible.)	Amount
New construction; no pre-existing unit; replace on failure; or replacement of an existing central air conditioning or heat pump unit (with a nameplate SEER rating of 10.1 or greater) with an air source heat pump (SEER 14.5 - 15.9)	\$150
New construction; no pre-existing unit; replace on failure; or replacement of an existing central air conditioning or heat pump unit (with a nameplate SEER rating of 10 or less) with an air source heat pump (SEER 16 or greater)	\$200
Replacement of an existing operational (cooling), central air conditioning or heat pump unit (with a nameplate SEER rating of 10.0 or less) with an air source heat pump (SEER 14.5 - 15.9)	\$400
Replacement of an existing operational (cooling), central air conditioning or heat pump unit (with a nameplate SEER rating of 10.0 or less) with an air source heat pump (SEER 16 or greater)	\$600
